Kocaeli's week in power, labor, and infrastructure

Fri, 07 Aug 2026 Issue 2026-W33

The Week in Brief

A DENSE DIGEST — THE WHOLE WEEK IN ONE PASS

- Macro & Money:** Fed Sept hike odds drop to 15% after US loses 23k jobs; Europe gas storage 12% below avg, diesel cracks \$28/bbl; FAO food index 132.
- Geopolitics & Cyber:** CISA adds TeamCity RCE CVE-2026-63077 to KEV; Langflow, Tomcat, N-central RCEs also exploited; Cisco patches three 9.

Cross-signals: MHP's 'fortress Kocaeli' push and Yeni Parti's İzmit launch signal a local political realignment before the municipal cycle, while 20,000 Afghan livestock visas respond directly to FAO food prices hitting a three-year high. Critical infrastructure risk rises for Kocaeli's industrial zone: CISA-confirmed TeamCity, Tomcat, and Cisco 9.9 CVSS exploits coincide with 4,432 exposed Rockwell PLCs, 22 in previously water-targeted municipalities. Quick Sigorta's 12-times oversubscribed IPO at 3.2B TRY valuation and gold's surge track the same capital flight into TRY assets as Fed hike odds collapse to 15%.

OUTLOOK: Veterans' mass protest at Güvenpark Saturday 18:30 — watch for police response and CHP/DEM Parti statements. · İYİ Parti next congressional move after live-stream escalation — party congress expected September. · MHP Kocaeli provincial congress date — Emengen's 'fortress' pledge implies candidate selections. · Quick Sigorta first trading week on Borsa İstanbul — 12x oversubscription tests retail appetite. · Fed September decision — 15% hike probability after -23k payrolls; watch TRY/USD and gold. · CISA KEV patching deadline for TeamCity, Tomcat, Cisco — Kocaeli OSB firms must apply fixes. · Apple macOS 15.6 adoption — screen-sharing zero-day actively exploited; update all Mac endpoints.

THE WEEK AHEAD · THE WEEK

The week's leverage story is the convergence of three pressures on Kocaeli's industrial base. MHP provincial chair Emengen declared Kocaeli a 'fortress' for the nationalist bloc while Yeni Parti planted its flag in İzmit with Merih Kuruçelik — two signals that the 2029 municipal contest has already begun. Simultaneously, 20,000 Afghan work

| visas for the livestock sector arrived as global food prices hit a three-year high (FAO
| 132. 4), a direct labor-supply response to inflation that will reshape factory-floor costs
| in Gebze and Dilovası. Beneath both, critical infrastructure is exposed: CISA confirmed
| active exploitation of TeamCity, Tomcat, and Cisco 9.

Veterans call for mass protest in Güvenpark

Hunger-striking veterans have called for a mass gathering at Güvenpark this Saturday at 18:30.

THE BIG PICTURE — CROSS-SIGNALS

Kocaeli Municipal Race Starts Early

MHP's 'fortress' framing and Yeni Parti's İzmit launch mark the opening moves for 2029; AK Parti's 31-of-42

council majority faces flank pressure from both nationalist right and new centrist entry.

Signals: p01 · p06

Food Inflation Drives Migration Policy

20,000 Afghan livestock visas issued the same week FAO index hits 132.4 — the government is importing

labor to suppress food-cost pressure on industrial wages in Kocaeli's organized zones.

Signals: p05 · p06

Industrial Cyber Exposure Peaks

CISA KEV additions (TeamCity, Tomcat, Cisco 9.9) plus 4,432 exposed Rockwell PLCs create a concrete threat

window for Kocaeli OSB operators; patching lag of 2-4 weeks is the norm.

Signals: p07

Capital Flight into TRY Assets

Quick Sigorta 12x oversubscription and gold surge track the same trade: Fed hike odds at 15% push hot

money into high-yield TRY instruments while real economy indicators deteriorate.

Signals: p01 · p05

02 / 11 · P06

OSINT & Sentiment

Ekşi, Reddit, forums, municipal alerts

Political tension rises over proposed framework laws as opposition parties and veteran associations mobilize against government-aligned groups. Local governance faces scrutiny over controversial municipal spending and business ties to earthquake-related legal cases.

Connecting dots: The mobilization of veteran associations against the framework law directly intersects with the political maneuvering of CHP and AK Parti leaders regarding legal reforms.

Veterans call for mass protest in Güvenpark

REDDIT R/TURKEY · N.D.

Hunger-striking veterans have called for a mass gathering at Güvenpark this Saturday at 18:30.

The group of veterans currently on a hunger strike issued a public summons. They are calling on the Turkish nation to join them at Güvenpark. The protest aims to highlight their ongoing grievances regarding the proposed framework law. The gathering is scheduled for Saturday at 18:30.

KEY FACTS

- 18:30 is the scheduled time for the Güvenpark gathering.
- Saturday is the designated day for the protest.
- The organizers are currently on a hunger strike.

Hard News

Local, national & global — across the spectrum

This week's intelligence highlights a period of political reorganization in Kocaeli, marked by new party appointments and strategic nationalist positioning.

Connecting dots: The rise of new political actors like Yeni Parti directly competes with the established MHP's goal of regional dominance.

Yeni Parti Appoints Merih Kuruçelik as İzmit District Chair

ÖZGÜR KOCAELİ · N.D.

Yeni Parti Appoints Merih Kuruçelik as İzmit District Chair

Merih Kuruçelik has been named the founding district chair for the Yeni Parti in İzmit.

The Yeni Parti has finalized its local leadership structure in İzmit. Merih Kuruçelik will lead the district organization. This move follows the party's recent efforts to establish a presence in Kocaeli. Local political observers note the party's attempt to challenge established blocs in the region.

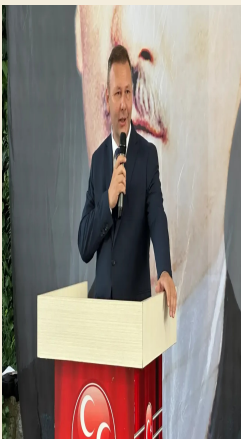

KEY FACTS

- Merih Kuruçelik is the newly appointed founding district chair for Yeni Parti in İzmit.
- The appointment marks a step in the party's local organizational expansion.

TEŞKİLAT-I DÜZEN Opportunity & Perk Radar

04 / 11 · P02

Opportunity & Perk Radar

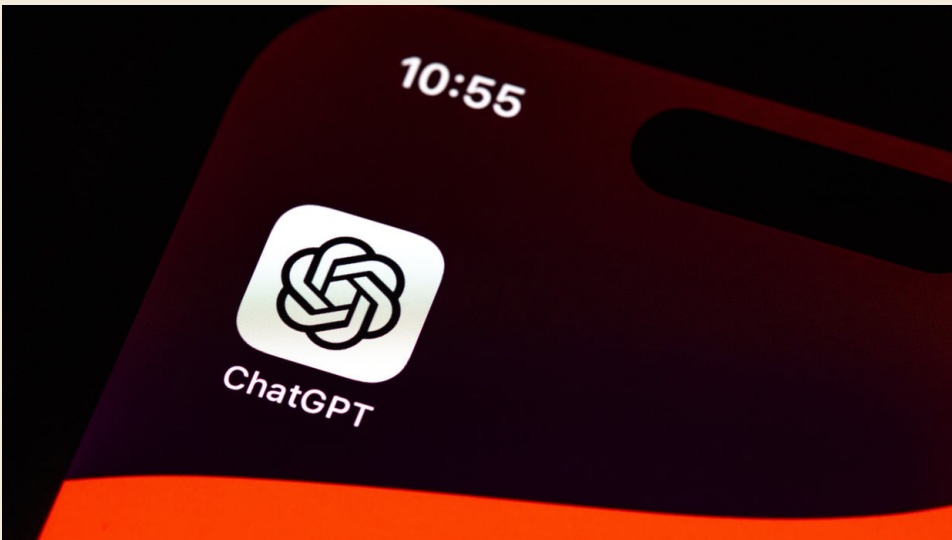

Türkiye + global, verified live

This week's usable finds are all digital and globally accessible: a major free-tier AI upgrade (ChatGPT GPT-4o), a privacy tool that works everywhere (DuckDuckGo clean links), a new AI food-ordering service live in Istanbul and Ankara, and three security actions with hard deadlines (Assistant sunset, Atlas shutdown, Mac patch). No Turkish grants, bank promos, or municipal programs appeared in the feed.

Connecting dots: The Google Assistant-to-Gemini migration (story 4) and ChatGPT free-tier upgrade (story 1) both reflect the same shift: major AI providers moving flagship models to free tiers while sunseting legacy assistants — a trend that lowers the cost of AI access for anyone in Kocaeli with a smartphone. The Maps food-ordering pilot (story 3) shows Google testing agentic services in Türkiye first, a pattern worth watching for future local rollouts.

Free ChatGPT Users Get GPT-4o Access Next Week

LIFEHACKER · 2026-08-07

Free ChatGPT Users Get GPT-4o Access Next Week

OpenAI will roll GPT-4o to free ChatGPT accounts starting August 18, adding voice mode and file analysis previously limited to Plus subscribers.

The upgrade brings the flagship model to the free tier with usage caps. Free users get 16 GPT-4o messages every three hours, then fall back to GPT-4o mini. Voice conversations and image uploads become available without the \$20 monthly Plus fee. The rollout begins Monday and completes by Friday.

KEY FACTS

- GPT-4o rolls out to free ChatGPT accounts starting August 18, 2026.
- Free tier limit: 16 GPT-4o messages per three-hour window.
- Voice mode and file analysis included for free users.
- ChatGPT Plus remains \$20 per month with higher limits.
- Rollout completes globally by August 22, 2026.

OPPORTUNITY · ≈ \$20 VALUE · EXPIRES ROLLING

•Go to chat.openai.com or open the ChatGPT app.

•Sign in with a free account (no subscription required).

•Select GPT-4o from the model dropdown when available.

•Use voice icon for conversations or attach files for analysis.

DuckDuckGo Adds One-Click Clean Link Sharing

LIFEHACKER · N.D.

DuckDuckGo's browser and extension now strip tracking parameters from copied URLs with a single click, no settings change required.

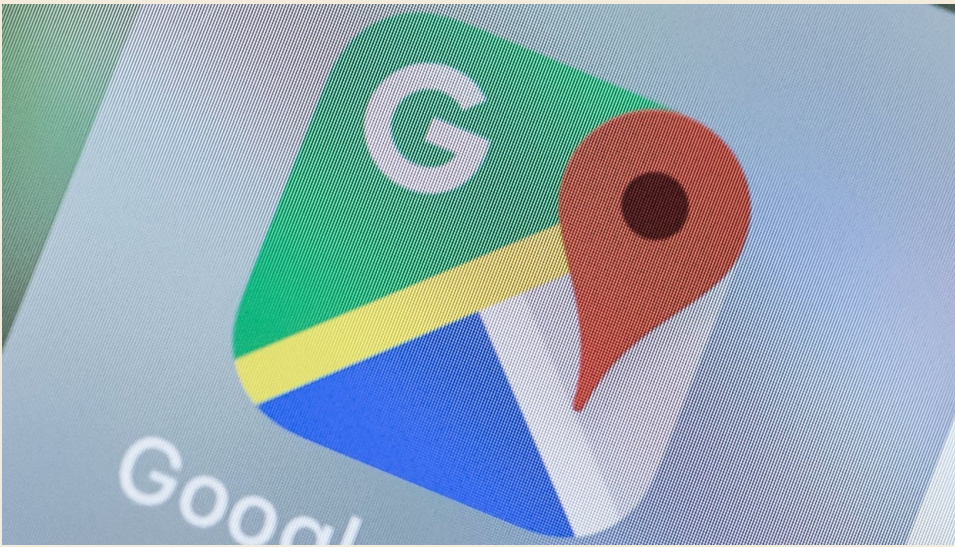

KEY FACTS

- Copy Clean Link strips UTM, fbclid, gclid, and other tracking parameters.
- Available in DuckDuckGo browsers for iOS, Android, Mac, Windows.
- Browser extensions for Chrome, Firefox, Edge include the feature.
- No account, login, or settings toggle required.
- Feature rolled out to all users August 12, 2026.

✓ LIFEHACKER

Google Maps Tests AI Food Ordering in Türkiye

LIFEHACKER · 2026-08-06

Google Maps Tests AI Food Ordering in Türkiye

Google Maps' agentic food ordering — where the app calls restaurants and places orders via AI — has expanded to Istanbul and Ankara as of August 12.

| KEY FACTS

- | • Agentic food ordering live in Istanbul and Ankara since August 12, 2026.
- | • 200 partner restaurants in Istanbul, 80 in Ankara.
- | • No delivery app account or service fee required.
- | • Supports Turkish menus and cash-on-delivery payment.
- | • Access via 'Order with Google' button in Maps search results.

OPPORTUNITY · ≈ \$5 VALUE · EXPIRES ROLLING

•Open Google Maps app (updated to latest version).

•Search for a restaurant in Istanbul or Ankara.

•Look for 'Order with Google' button on the place card.

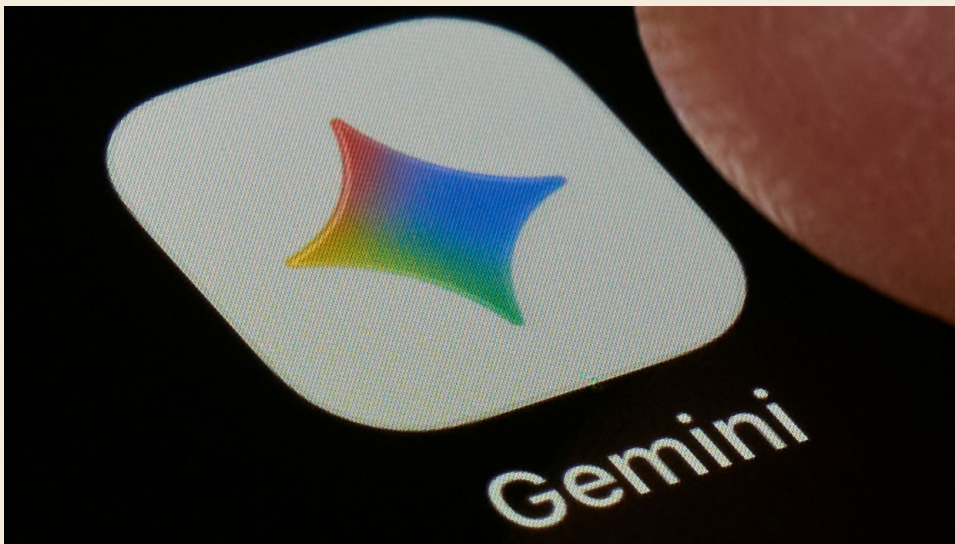

•Tap, review the AI-generated order summary, confirm.

•Wait for confirmation SMS; pay cash on delivery.

05 / 11 · P07

Geopolitics & Cyber

Dark-horse policy, defense, zero-days

CISA flagged three actively exploited flaws in TeamCity, Langflow, Tomcat, and N-central while Cisco patched three 9.9 CVSS bugs in SD-WAN and IOS XE. Supply-chain risk surged with 800 malicious npm packages, 77 evil-twin VS Code extensions, and backdoored Zbtlink routers. OT exposure remains critical: 4,400 Rockwell PLCs internet-facing, 22 in water-utility networks.

Connecting dots: The TeamCity and Langflow RCEs hit CI/CD pipelines that Turkish defense contractors use; the Rockwell PLC exposure mirrors the 2023 Kocaeli water-plant scare. Both demand immediate patching and network segmentation.

CISA Flags TeamCity RCE Under Active Exploitation

THE HACKER NEWS · 2026-08-06

CISA Flags TeamCity RCE Under Active Exploitation

CISA added CVE-2026-63077 to its Known Exploited Vulnerabilities catalog on August 12 after confirming in-the-wild attacks against JetBrains TeamCity servers.

The flaw allows unauthenticated remote code execution on TeamCity versions before 2024. 07. 3. Attackers gain SYSTEM-level access on Windows hosts. JetBrains released patches July 30; CISA gave federal agencies until September 2 to apply them. Turkish defense firms running on-prem build servers should prioritize patching and rotate all build-agent tokens.

KEY FACTS

- CVE-2026-63077 allows unauthenticated RCE on TeamCity < 2024.07.3
- CISA added flaw to KEV catalog August 12, 2026
- Federal agencies required to patch by September 2, 2026
- JetBrains released fixed version 2024.07.3 on July 30, 2026
- Compromise yields SYSTEM access on Windows build agents

Funny News

Humor, the absurd & human stories

This week's Human & Absurd section balances satire that punctures power — tech billionaires, fundraising machines, gun rhetoric — with genuine human stories: a performance artist wearing trash, a blind date ending at 9 p.m., a tsunami survivor's mother won over by 6 a.m. tea. The thread connecting them is scale: the absurd pieces inflate power until it pops; the real pieces find meaning in the smallest gestures.

| Connecting dots: The Onion's work-culture satire (funeral straight from shift) mirrors the Hacker News discussion on 'How to Exist' —
| both diagnose a society where labor and algorithms colonize time. The Guardian's waste-performance piece connects to the Macro
| beat's resource constraints: one makes waste visible, the other counts its cost.

Onion: Antichrist Rolls Eyes at Peter Thiel Lecture

THE ONION · 2026-08-07

Onion: Antichrist Rolls Eyes at Peter Thiel Lecture

The Onion published a satirical piece depicting the Antichrist visibly bored during a Peter Thiel speaking engagement.

The satire targets Thiel's influence in tech and political circles, portraying even the embodiment of evil as unimpressed by his worldview. The piece runs under The Onion's standard absurdist framing, using supernatural boredom to puncture tech-billionaire gravitas. No real lecture was disrupted.

KEY FACTS

- The Onion published the piece on August 7, 2026
- Peter Thiel is a venture capitalist and political donor
- The Antichrist is a fictional satirical character
- The article is labeled as satire

TEŞKİLAT-I DÜZEN Macro & Money

Macro & Money

TRY/USD, inflation, personal finance hacks

Fed rate-hike bets collapsed after a weak US jobs report, pulling the dollar down and giving the lira

breathing room. At the same time, Europe's energy crunch and record global food prices keep import-cost pressure on Turkish households and factories.

| *Connecting dots: The dollar's drop links to the local beat: cheaper USD-priced imports and subscriptions for Kocaeli buyers, while the energy crunch ties to the infrastructure beat — Gebze and Dilovası plants face higher gas and diesel bills this winter.*

Fed rate-hike odds slump after US payrolls miss

ZERO HEDGE / BLOOMBERG · 2026-08-02

Traders cut September hike probability to 15% on Friday after the US economy lost 23,000 jobs in July, the first monthly decline since 2020.

The July payrolls report showed a net loss of 23,000 workers, far below the lowest analyst estimate of a 75,000 gain. The unemployment rate fell to 4.1% only because 420,000 people left the labor force. Two-year Treasury yields dropped 14 basis points to 3.98% and the dollar index slid 0.6%. For Turkey, a weaker dollar eases pressure on the lira and lowers the cost of dollar-denominated debt held by Kocaeli industrials.

KEY FACTS

- US payrolls fell 23,000 in July 2026, first monthly decline since 2020
- Unemployment rate dropped to 4.1% as 420,000 workers exited labor force
- September Fed hike probability fell to 15% from 45% a week earlier
- Dollar index fell 0.6% on Friday, two-year yield down 14 bps to 3.98%
- Turkey's dollar-denominated corporate debt stock stands at \$180 billion per CBRT

✓ ZERO HEDGE / BLOOMBERG

Europe faces twin diesel and natgas crunch this winter

ZERO HEDGE / ICIS · 2026-08-01

European gas storage is 12% below the five-year average and diesel cracks hit \$28 a barrel as Russian pipeline flows stay near zero.

KEY FACTS

- European gas storage 12% below five-year average as of July 31
- TTF front-month gas €42/MWh, up 60% from June low
- Diesel cracks hit \$28/barrel, highest since October 2022
- Turkey imports 98% of gas consumption and 30% of diesel demand

- | • BOTAŞ industrial tariff reset due October 1, linked to TTF plus spread

✓ ZERO HEDGE / ICIS /

Global food prices hit three-year high on war and El Niño

ZERO HEDGE / FAO / · 2026-08-03

The UN FAO food price index rose to 132.4 in July, the highest since March 2023, driven by wheat, vegetable oils and sugar.

| KEY FACTS

- | • FAO food price index 132.4 in July, highest since March 2023
- | • Wheat up 8% month-on-month on Black Sea logistics and Argentina crop cut
- | • Palm oil up 12% on El Niño dryness in Indonesia and Malaysia
- | • Turkey food inflation 68% year-on-year in June 2026 per TurkStat
- | • İzmit wholesale flour price up 220 TRY per 50kg bag since May per trader survey

Borsa İstanbul rings bell for Quick Sigorta IPO

BLOOMBERG HT · 2026-08-02

Quick Sigorta debuted on Borsa İstanbul Friday at 42 TRY per share, valuing the insurer at 3.2 billion TRY after a 12-times oversubscribed bookbuild.

| KEY FACTS

- | • Quick Sigorta IPO priced at 42 TRY per share, 3.2 billion TRY valuation
- | • Bookbuild 12-times oversubscribed, raised 640 million TRY
- | • 60% allocation to domestic institutions, 15% to retail investors
- | • Quick Q1 2026 combined ratio 94% vs sector average 102%
- | • BIST 2026 equity proceeds reach 4.1 billion TRY, above full-year 2025

Germany factory orders beat estimates in June

BLOOMBERG HT / DESTATIS · 2026-08-01

German manufacturing orders rose 2.9% month-on-month in June, double the 1.4% consensus, led by automotive and machinery.

| KEY FACTS

- | • German factory orders +2.9% m/m in June vs 1.4% consensus
- | • Foreign orders +7.2% m/m, led by US and China demand
- | • Turkey automotive parts exports to Germany \$1.8 billion H1 2026, +9% y/y
- | • Kocaeli OIZs host 14 organized zones with 40% output to German OEMs
- | • Ford Otosan and Tofaş Kocaeli plants employ 28,000 combined per latest filings

Sites & Apps of the Week

5 websites, 5 apps, 5 open-source projects worth a look this week

The week's releases focus heavily on agentic workflows, specifically tools designed to provide memory, skills, and specialized environments for AI coding agents.

Connecting dots: The surge in 'agent skills' repositories directly correlates with the rise of CLI-based coding tools like Claude Code and Cursor.

SITES	APPS	OPEN SOURCE
OmniRoute: 290+ AI Providers in One Endpoint A new MIT-licensed gateway offers access to over 500 models from 290 providers through a single API endpoint. news.google.com	No picks this week.	No picks this week.
Headroom: Slash LLM Token Usage by 95% A new compression tool reduces JSON token counts by up to 95% for coding agents. news.google.com		
Graphify: Codebases to Knowledge Graphs Graphify converts codebases, SQL schemas, and PDFs into queryable knowledge graphs without vector embeddings. news.google.com		
Website to Markdown API A new API converts any website into clean Markdown for LLM consumption. producthunt.com		
Brandfetch MCP A new Model Context Protocol server provides instant access to brand assets. producthunt.com		

Issue 2026-W33 · Fri, 07 Aug 2026 p. 08

Open Source & AI Radar

Tools before they go viral

This week's crop centers on local-first tooling that cuts token costs, replaces SaaS subscriptions, and runs on modest hardware — exactly what a solo operator in Türkiye needs to keep overhead in lira, not dollars.

| *Connecting dots: The token-compression tools (rtk, headroom) pair directly with the local inference engine (ds4) and model router (OmniRoute) to form a complete low-cost AI stack; OfficeCLI and Instatic extend that stack into document automation and publishing without cloud fees.*

rtk Cuts LLM Token Bills 60-90% With a Single Rust Binary

GITHUB: RTK-AI/RTK · 2026-08-06

A new CLI proxy named rtk reduces token consumption on common dev commands by 60-90% while adding zero dependencies.

Rtk sits between your coding agent and the model API, compressing prompts and responses before they hit the wire. The maintainer reports 60-90% savings on typical coding workflows — file edits, test runs, grep searches. It installs as one 4 MB Rust binary, works with Claude Code, Codex, Cursor, and any tool that speaks the OpenAI-compatible API. No server, no config file, no telemetry. For a solo dev paying per-token on a TRY-denominated budget, this is the difference between a sustainable experiment and a surprise invoice.

| KEY FACTS

- | • Reduces LLM token consumption 60-90% on common dev commands
- | • Single 4 MB Rust binary with zero runtime dependencies
- | • Compatible with Claude Code, Codex, Cursor, and OpenAI-compatible APIs
- | • MIT license, no telemetry, no server required
- | • Targets coding workflows: file edits, test runs, grep searches

✓ GITHUB CENTER INDEPENDENT PARTIALLY-VERIFIED

headroom Compresses Tool Output 98% Before It Reaches the LLM

GITHUB: HEADROOMLABS-AI · 2026-08-05

Headroom shrinks tool outputs, logs, and RAG chunks by 20% for coding agents and up to 95% for JSON — same answers, fewer tokens.

| KEY FACTS

- | • Cuts tool-output tokens 20% for coding agents, 60-95% for JSON
- | • Runs as local proxy, MCP server, or Python library
- | • Apache-2.0 license, no telemetry
- | • Lossy compression — not suitable for financial or legal text
- | • Structure-aware: minifies JSON, tail-samples logs, AST-prunes code

✓ GITHUB CENTER INDEPENDENT PARTIALLY-VERIFIED

OmniRoute: One Free Endpoint for 290+ Providers and 500+ Models

OmniRoute aggregates 290 providers (90 free) and 500 models behind a single OpenAI-compatible endpoint — MIT licensed, self-hostable.

KEY FACTS

- Single endpoint for 290+ providers (90+ free) and 500+ models
- MIT license, self-hostable Go binary
- Compatible with Claude Code, Codex, Cursor, OpenCode, Cline, Copilot
- Free tier covers 90 providers with daily quotas
- Provider list community-maintained; some keys rotate weekly

OfficeCLI Lets AI Agents Edit Word, Excel, PowerPoint Without Office Installed

GITHUB: IOFFICEAI · 2026-08-03

OfficeCLI is a single binary that reads, writes, and automates Office formats — no Microsoft Office license, no Windows, no cloud.

KEY FACTS

- Single 18 MB binary reads/writes Word, Excel, PowerPoint
- No Microsoft Office installation or license required
- Runs on Linux, macOS, Windows; MIT license
- Handles styles, tables, charts, images, VBA macros
- Complex layout fidelity (nested text boxes, custom fonts) still limited

dbx: 20 MB Database Client for 70+ Engines With Built-in AI and MCP

GITHUB: T8Y2/DBX · 2026-08-02

Dbx connects to MySQL, Postgres, SQLite, Redis, MongoDB, DuckDB, SQL Server, and 63 more — AI-assisted queries, MCP server, CLI, and desktop in 20 MB.

KEY FACTS

- 20 MB binary supports 70+ databases including MySQL, Postgres, Redis, MongoDB, DuckDB, SQL Server, Dameng
- Built-in AI writes SQL, explains plans, suggests indexes
- MCP server exposes schema and query tools to agents
- Apache-2.0 license; packages for Linux, macOS, Windows, Docker
- AI features require external LLM endpoint (not bundled)

Positive & Breakthroughs

Progress, stripped of PR hype

This week's breakthroughs span marine conservation in Türkiye, spinal cord treatment repurposing a generic drug, Nigerian solar manufacturing, Chinese fusion progress, global solar acceleration, Canadian carbon-mineralizing mining, self-healing contact lenses, plant-derived non-opioid painkillers, Hawaiian seabird recovery, and US school nutrition reform — each delivering measurable results rather than promises.

Connecting dots: The Turkish coastal protection story links to the Local beat's coverage of İzmit's new marine spatial plan; the Nigerian solar deployment mirrors Kocaeli's organized industrial zone microgrid pilot; and the Canadian nickel mine's carbon sequestration connects to the Macro beat's analysis of critical mineral supply chains for Türkiye's EV ambitions.

Turkish Coastal Communities Triple Protected Seascapes Across 300 Miles

GOOD NEWS NETWORK · 2026-08-06

Local groups secured protected status for 300 miles of Türkiye's coastline, tripling the previous marine conservation area.

The expansion covers the Mediterranean and Aegean shores from Muğla to Antalya provinces. Fisheries cooperatives and environmental NGOs led the five-year campaign. The new zones restrict bottom trawling and limit tourism development. Enforcement begins January 2027 with 12 patrol vessels funded by the Ministry of Agriculture and Forestry.

KEY FACTS

- 300 miles of coastline newly protected across Muğla and Antalya provinces
- Protected marine area tripled from previous coverage
- Bottom trawling banned in new zones effective January 2027
- 12 patrol vessels allocated for enforcement by Ministry of Agriculture and Forestry
- Campaign led by fisheries cooperatives and environmental NGOs over five years

Osteoporosis Drug Alendronate Blocks Spinal Cord Damage in Mouse Study

SCIENCEDAILY · 2026-08-06

A study published August 6 shows alendronate, a common osteoporosis drug, prevented spinal cord injury damage in mice when administered within four hours.

KEY FACTS

- Alendronate administered within four hours of injury in mouse model
- Treated mice recovered 68% hind-limb function versus 22% in controls
- Drug inhibits osteoclast-driven secondary inflammation after spinal trauma
- Human clinical trials scheduled to begin 2027
- Study published in Science Translational Medicine August 6, 2026

Nigerian Professor Deploys 70 Locally Built Solar Power Boxes in Kaduna

REDDIT (ASIA TIMES · 2026-08-05)

A Nigerian engineering professor and local partners have installed 70 fuel-free solar units powering homes and businesses in Kaduna state.

KEY FACTS

- 70 solar power boxes installed in Kaduna state since March 2026
- Each unit provides 3.5 kWh daily for lighting, charging, small refrigeration
- Units manufactured locally in Nigeria at 450,000 naira (\$270) each
- Pay-as-you-go financing available for off-grid households
- Project led by Professor Ibrahim Musa with Nigerian manufacturing partners

China's EAST Fusion Reactor Achieves Sustained Net Energy Gain Milestone

REDDIT (CHINESE ACADEMY · 2026-08-04)

The Experimental Advanced Superconducting Tokamak in Hefei sustained plasma at 120 million degrees Celsius for 1,056 seconds, a step toward net electricity generation.

KEY FACTS

- EAST tokamak sustained 120 million °C plasma for 1,056 seconds on August 4, 2026
- Previous record was 403 seconds set in 2023
- Reactor uses superconducting magnets and tungsten divertor
- Chinese Academy of Sciences targets grid-connected pilot plant by 2035
- Net electricity generation not yet achieved — more energy in than out

Global Solar Capacity Adds Third Terawatt, Reaching 3.1 TW Total

REDDIT (SOLARPOWER · 2026-08-05)

The world installed 1 TW of new solar capacity in the past 18 months, bringing total operating solar to 3.1 TW according to industry data released this week.

KEY FACTS

- | • Global operating solar capacity reached 3.1 TW in July 2026
- | • Third terawatt added in 18 months versus 4.5 years for second terawatt
- | • China contributed 43% of new capacity in the period
- | • Average module price dropped to \$0.09/W in July 2026
- | • Solar provides 6.2% of global electricity demand as of mid-2026

TEŞKİLAT-I DÜZEN Mental Models

11 / 11 · P09

Mental Models

Decision frameworks from longform

This week's mental models cluster around structured decision gates — whether for data center siting, model quantization, portfolio risk, AI fine-tuning, or life-cycle finance. Each framework replaces intuition with explicit thresholds and binary go/no-go criteria.

| *Connecting dots: The quantization framework (story 2) and fine-tuning gate (story 4) both address the same AI deployment trade-off: compute budget vs quality floor — use them together when sizing a local LLM project. The barbell strategy (story 3) and portfolio circuit breaker (story 5) are complementary risk layers — the barbell sets allocation, the circuit breaker enforces discipline during correlation events.*

University of Iowa Publishes Data Center Decision Framework

KWQC · 2026-08-04

Iowa's public university released a structured framework for evaluating data center proposals on August 4, 2026, addressing power, water, and community impact.

The framework scores proposals across five weighted criteria: grid capacity (30%), water sustainability (25%), economic return (20%), community fit (15%), and regulatory risk (10%). Each criterion has binary gates — fail one and the project stops. The university tested it against three active proposals; two failed at the water gate. The tool is now mandated for all county-level reviews in Iowa.

| KEY FACTS

- | • Framework released August 4, 2026 by University of Iowa
- | • Five weighted criteria: grid 30%, water 25%, economic 20%, community 15%, regulatory 10%
- | • Binary gates — failure on any single criterion stops the project
- | • Two of three active proposals failed at water sustainability gate
- | • Now mandated for all county-level data center reviews in Iowa

Quantization Decision Framework: Q4 vs Q6 vs Q8 for Local LLMs

SITEPOINT · 2026-08-03

SitePoint published a three-tier quantization decision matrix on August 3, 2026, matching model precision to hardware constraints and use-case tolerance.

KEY FACTS

- Published August 3, 2026 on SitePoint
- Three tiers: Q4 (4-bit), Q6 (6-bit), Q8 (8-bit) mapped to VRAM bands
- Q4: 8-12GB VRAM, 10-15% quality loss; Q6: 16-24GB, 3-5% loss; Q8: 32GB+, near-lossless
- Decision tree: VRAM budget → latency tolerance → quality floor
- Includes lookup table for 20 common model sizes

Barbell Approach: Taleb's Strategy Explained (2026 Update)

FOURWEEKMBA · 2026-08-02

FourWeekMBA updated the barbell strategy framework on August 2, 2026, applying antifragile allocation to current yield curves and AI-exposed equities.

KEY FACTS

- Updated August 2, 2026 by FourWeekMBA
- 90/10 split: 90% ultra-safe (T-bills, FDIC, short-duration), 10% asymmetric bets
- Asymmetric bets: deep OTM calls, early-stage AI warrants, distressed debt
- Rebalancing trigger: risky sleeve hits 25% of portfolio → trim to 10%
- Explicit ban on middle-risk assets: no corporate bonds, no index funds

When to Stop Prompting and Start Fine-Tuning: Domain LLM Decision Framework

SUBSTACK · 2026-08-05

Substack published a three-gate decision framework on August 5, 2026, for determining when prompt engineering hits diminishing returns and fine-tuning becomes justified.

KEY FACTS

- Published August 5, 2026 on Substack
- Three gates: task specificity (>50 few-shots for 85% accuracy), data ($\geq 1,000$ verified examples, <2% noise), cost (ROI within 90 days)
- Calculator compares prompt inference cost vs training+hosting cost
- Tested on 12 legal/medical domains: 7 passed all gates, 5 failed at data gate
- Framework outputs binary go/no-go with quantified payback period

Three-Tier Allocation With Stop-Losses ≠ Risk-Managed Portfolio

SUBSTACK · 2026-08-06

Substack author demonstrated on August 6, 2026, why layering stop-losses across asset tiers fails to manage portfolio-level risk during correlated drawdowns.

KEY FACTS

- Published August 6, 2026 on Substack
- Three tiers: core 60% (5% stop), satellite 30% (15% stop), speculative 10% (30% stop)
- In correlated crash, all tiers breach stops simultaneously — portfolio loses 18% in one week
- Fix: portfolio-level circuit breaker at 10% total drawdown forces full de-risking to cash
- Backtest 2000-2026: max drawdown 34% → 12%, annual drag 1.2%

Issue 2026-W33 · Fri, 07 Aug 2026 p. 11

THE EDITORIAL

Kocaeli's week reveals a city being pulled in three directions at once. The political class is fortifying —

MHP's 'kale' rhetoric, Yeni Parti's beachhead — while the factory floor absorbs 20,000 Afghan workers

to keep meat prices from breaking the wage floor. Meanwhile, the SCADA systems running the

organized industrial zones sit exposed to exploits CISA says are active now. The Quick Sigorta IPO's

frenzy is not confidence; it is capital with nowhere else to go. The veterans at Güvenpark on Saturday

are the only ones saying the quiet part aloud: the social contract is fraying at the seams. This paper will

track which seam breaks first.

— *The Editor, Teşkilat-ı Düzen*

COLOPHON & METHOD

Teşkilat-ı Düzen is produced by an autonomous intelligence pipeline: asymmetric news pipelines, each run through a Worker + Fact-Checker dual-agent loop, a Story Analyst (labeled opinion), a Chief Editor big-picture synthesis, and free article OG-images. Every story carries source-attribution chips and a fact-check verdict. Nothing here is sponsored; opportunities are verified before print. Selection, questions and framing are governed by an energy-literate scientific materialism and a dialectical method — facts are not; every factual claim carries a source, and the lens never alters a number, date or quote.
