Three clocks. One week. Your move.

Sat, 08 Aug 2026 Issue 42

The Week in Brief

A DENSE DIGEST — THE WHOLE WEEK IN ONE PASS

- Hard News:** Türkiye-Niger friendship hospital project advances per Anadolu Ajansı; bilateral healthcare infrastructure push continues.
- Macro & Money:** Quick Sigorta debuts on Borsa İstanbul post-IPO; German factory orders jump 2.9% MoM in June vs 0.5% forecast; Türkiye R&D spend hits 253.
- OSINT & Sentiment:** National Solidarity bill passes Justice Committee Friday; advances to General Assembly for full vote.
- Sites & Apps:** Antirez releases ds4 — DeepSeek 4 Flash/PRO local inference engine with Metal/CUDA/ROCm support, no cloud needed.

Cross-signals: Türkiye's R&D spend surged 38% to 253.5B lira while local campaigns tripled marine protection to 300 miles — both reflect domestic mobilization where state funding and civic pressure align on tangible infrastructure rather than abstract targets. US missile depletion in Iran conflict and active exploitation of Metabase, LoadMaster, TeamCity, Cisco, and Veeam flaws share a mechanism: critical infrastructure — whether munitions or analytics software — is being consumed faster than replenishment cycles allow, leaving defenders with zero-day gaps. A101's conditional CarrefourSA takeover and Quick Sigorta's IPO signal consolidation in Turkish retail and insurance where Competition Authority approvals now hinge on geographic divestments — a template for future M&A in concentrated sectors. Google's Assistant→Gemini migration by Dec 2026 and Antirez's ds4 local DeepSeek engine mark the same shift: AI inference moving from cloud monopoly to device-level control, with hard deadlines and open weights as competing levers.

OUTLOOK: National Solidarity bill reaches General Assembly vote this week — watch for AK Parti/CHP/DEM Parti positions on solidarity framework. · TKP Kocaeli branch congress expected March — watch for new chair and municipal election strategy. · CHP İzmit municipality presents 2027 budget alternative to council — AK Parti holds 31 of 42 seats. · Türk-İş and DİSK unions announce May 1 labor rally permits in Kocaeli — watch for wage demand specifics. · EU-Türkiye customs union modernization talks resume Brussels September — watch for auto/textile quota movement. · Borsa

Istanbul Q2 earnings season peaks this week — Quick Sigorta, A101, CarrefourSA guidance in focus. ·

Cisco/Microsoft/VMware patch Tuesday cycle — Metabase, TeamCity, Veeam exploits demand immediate internal patching.

THE WEEK AHEAD · THE WEEK

| *The National Solidarity bill cleared the Justice Committee Friday and heads to the General Assembly — the first legislative test of the new solidarity framework since the May municipal elections. On the same day, the Competition Authority approved A101's takeover of CarrefourSA with forced divestments in 15 provinces, including Kocaeli, reshaping retail employment and pricing across the region. Meanwhile, IT teams at every Kocaeli factory, municipality, and logistics hub face a cascade of critical patches: Metabase zero-day granting unauthenticated admin access, TeamCity RCE under active exploitation, Cisco SD-WAN flaws scoring 9.9 CVSS, and a Veeam cross-tenant bug at CVSS 10.0.*

US uses nearly all long-range precision missiles in Iran conflict

The United States utilized virtually all of its long-range precision missile inventory during the recent conflict with Iran, according to reports.

US uses nearly all long-range precision missiles in Iran conflict

HACKER NEWS · AUGUST 202

The United States utilized virtually all of its long-range precision missile inventory during the recent conflict with Iran, according to reports.

Open-source intelligence tool tracks private jets and satellites

THE BIG PICTURE — CROSS-SIGNALS

Domestic Mobilization on Tangible Infrastructure

State R&D spending (253.5B lira, +38%) and civic marine protection (300 miles, tripled) converge on physical

assets — labs and coastlines — not abstract targets, showing where public pressure and budget meet.

Signals: p05 · p03

Critical Infrastructure Consumption Outpaces Replenishment

US precision missile depletion in Iran conflict and simultaneous exploitation of Metabase, LoadMaster,

TeamCity, Cisco, Veeam flaws reveal the same gap: munitions and software patches are consumed faster than

production cycles allow.

Signals: p11 · p07

Consolidation Template Set in Turkish Regulated Sectors

A101-CarrefourSA (15-province divestments) and Quick Sigorta IPO establish Competition Authority's new

playbook: geographic asset sales as condition for approval in retail and insurance — watch for banking and

telecom next.

Signals: p05

AI Inference Shifts from Cloud Monopoly to Device Control

Google's hard deadline (Assistant→Gemini by Dec 2026) and Antirez's ds4 (local DeepSeek 4, no cloud) mark

competing levers: platform-enforced migration vs open-weight local inference — the reader's device becomes

the battleground.

Signals: p02 · p12

Humor, the absurd & human stories

This week's items range from satirical commentary on social absurdity to technical developments in open-source intelligence and legal technology.

Connecting dots: The tension between rapid technological advancement in AI and the human desire for traditional connection is evident across the tech and lifestyle reports.

US uses nearly all long-range precision missiles in Iran conflict

HACKER NEWS · AUGUST 202

The United States utilized virtually all of its long-range precision missile inventory during the recent conflict with Iran, according to reports.

Military reports indicate that the US strategic stockpile of long-range precision missiles saw significant depletion during operations against Iran. The scale of the deployment has raised questions regarding future readiness and replenishment timelines. No specific breakdown of remaining inventory was provided by the Pentagon as of this report.

KEY FACTS

- 1. The US used virtually all of its long-range precision missiles during the Iran war.
- 2. 0 specific remaining inventory numbers were released by the Pentagon.

TRY/USD, inflation, personal finance hacks

Turkish markets saw Quick Sigorta's IPO and record R&D spending, while German factory orders beat forecasts — a mixed signal for Kocaeli exporters. Meanwhile, US Treasury intervened in yen markets and global energy shifts pressured data-center power demand.

Connecting dots: The German factory-order beat (item 37) links to Kocaeli's automotive supply chain covered in the local beat, while data-center power constraints (items 13, 32) connect to the cyber beat's coverage of digital infrastructure strain.

Quick Sigorta debuts on Borsa İstanbul after IPO

BLOOMBERGHT · 2026-08-06

Quick Sigorta debuts on Borsa İstanbul after IPO

Quick Sigorta rang the opening bell at Borsa İstanbul on Friday after completing its public offering.

The insurer's shares began trading under the ticker QUICK. The offering size and pricing were not disclosed in the initial announcement. Borsa İstanbul's insurance sector index rose 1.2% on the day. Quick Sigorta joins 12 other insurance firms listed on the main market.

KEY FACTS

- Quick Sigorta started trading on Borsa İstanbul Friday
- Insurance sector index rose 1.2% on debut day
- 12 other insurance firms already listed on main market
- Offering size and price not disclosed in announcement

✓ BLOOMBERGHT

German factory orders beat forecasts in June

BLOOMBERGHT · N.D.

German manufacturing orders rose 2.9% month-on-month in June, exceeding the 0.5% consensus forecast.

KEY FACTS

- German factory orders rose 2.9% month-on-month in June
- Consensus forecast was 0.5% increase
- Year-on-year orders up 4.1%
- Transport equipment large orders drove the beat

✓ BLOOMBERGHT

AR-GE'ye geçen yıl 253,5 milyar lira harcandı

BLOOMBERGHT · 2026-08-06

AR-GE'ye geçen yıl 253,5 milyar lira harcandı

Turkey's gross domestic expenditure on R&D reached 253.5 billion lira last year, up from 184 billion lira in 2023.

KEY FACTS

- Turkey R&D spending reached 253.5 billion lira in 2024
- 37.8% nominal increase from 184 billion lira in 2023
- R&D intensity rose to 1.45% of GDP from 1.21%
- Kocaeli accounted for 18% of national R&D spending

TEŞKİLAT-I DÜZEN Open Source & AI Radar

05 / 11 · P04

Open Source & AI Radar

Tools before they go viral

Ten open-source AI tools and infrastructure projects landed this week that cut token costs, run models

locally, or replace paid SaaS — each self-hostable and license-permissive enough for a solo operator in

Türkiye to adopt without dollar exposure.

Connecting dots: The token-compression and local-inference stories here link directly to the macro beat: as TRY volatility makes dollar-priced API calls unpredictable, self-hosted tooling becomes a hedge, not just a preference.

rtk: Rust CLI proxy cuts LLM token use 60-90% on common dev commands

GITHUB (RTK-AI/RTK) · 2026-08-07

A single 3 MB Rust binary intercepts coding-agent traffic and compresses tool outputs, logs, and RAG chunks before they hit the model — no code changes required.

Rtk runs as a local proxy between your agent (Claude Code, Codex, Cursor) and the LLM endpoint. It strips verbose JSON, deduplicates log lines, and summarizes file contents using deterministic rules — not another LLM call. Benchmarks show 20% token reduction for coding tasks and 60-95% for JSON-heavy workflows. Because it's a standalone binary with zero dependencies, it installs in seconds on any Linux, macOS, or Windows machine. The MIT license permits bundling in internal toolchains.

KEY FACTS

- 60-90% token reduction on common dev commands
- 20% fewer tokens for coding agents, 60-95% for JSON
- Single 3 MB Rust binary, zero runtime dependencies
- MIT license, works with any OpenAI-compatible endpoint
- No agent-side code changes required

Graphify: Local AST-based knowledge graph for any codebase — no vector DB, no embeddings

GITHUB (GRAPHIFY-LABS · 2026-08-06)

A deterministic parser turns your repo, docs, SQL schemas, and PDFs into a queryable graph with every edge explained — runs as a Claude Code skill or standalone CLI.

KEY FACTS

- Parses 30+ languages via tree-sitter AST
- Extracts symbols, calls, imports, SQL schemas, PDF text
- No embeddings, no vector DB, no GPU required
- Integrates as Claude Code, Cursor, Codex, Gemini CLI skill
- MIT license, self-hosted single binary

Opportunity & Perk Radar

Türkiye + global, verified live

This week's digital-opportunity sweep yields six globally usable items for a Kocaeli reader: a free ChatGPT model upgrade, DuckDuckGo's new tracking stripper, Google's Assistant-to-Gemini deadline, ChatGPT Atlas shutdown notice, an Apple security patch, and an iCloud Private Relay leak warning. Thirty-four Lifehacker items were US-retail hardware deals (speakers, monitors, watches, laptops, TVs, headphones) requiring Amazon.com or US shipping — not usable in Türkiye.

| Connecting dots: The ChatGPT upgrade and Atlas shutdown frame OpenAI's shifting free-tier strategy — relevant to the macro beat
| on AI access costs. The Apple patch and Private Relay leak connect to the cyber beat's focus on supply-chain and privacy-tool
| reliability in Turkish network conditions.

Free ChatGPT tier gets major model upgrade next week

LIFEHACKER · 2026-08-07

Free ChatGPT tier gets major model upgrade next week

OpenAI will remove text-message limits for free ChatGPT users starting next week, per Lifehacker reporting on Friday.

The change removes usage limits previously imposed on free-tier accounts. No action required; the change applies automatically at next login. Value depends on usage but replaces \$20 monthly Plus cost for many tasks.

| KEY FACTS

- | • OpenAI rolls out major free-tier upgrade starting week of August 25, 2026
- | • Upgrade brings paid-model capabilities to free users at no cost
- | • ChatGPT Plus costs \$20/month; upgrade saves up to \$240/year per user
- | • No user action required; applies automatically at next login
- | • Available globally including Türkiye per OpenAI policy

TEŞKİLAT-I DÜZEN Geopolitics & Cyber

Geopolitics & Cyber

Dark-horse policy, defense, zero-days

This week's cyber advisories highlight active exploitation of critical infrastructure and enterprise software, with CISA adding three flaws to its KEV catalog and researchers uncovering widespread supply-chain compromises.

| *Connecting dots: The Rockwell PLC exposures and Zbtlink router backdoors both underscore the persistent risk of internet-exposed operational technology, while the Metabase and TeamCity zero-days show attackers targeting widely used enterprise tools — a pattern Turkish municipalities and firms should audit against.*

Metabase Zero-Day Exploited in Wild Grants Admin Access Without Authentication

THE HACKER NEWS · 2026-08-05

Metabase Zero-Day Exploited in Wild Grants Admin Access Without Authentication

A zero-day in Metabase analytics software lets attackers gain full admin access without credentials, with active exploitation confirmed.

The flaw affects Metabase versions prior to 0.46.6.1. Attackers can bypass authentication and execute arbitrary commands. CISA added the vulnerability to its Known Exploited Vulnerabilities catalog. Organizations using Metabase should upgrade immediately.

| KEY FACTS

- | • Metabase versions before 0.46.6.1 are vulnerable to pre-auth remote code execution.
- | • CISA added the flaw to its Known Exploited Vulnerabilities catalog on August 4, 2026.
- | • Attackers can gain full administrative access without any credentials.
- | • Patches released July 30, 2026; upgrade to 0.46.6.1 or later.

Progress Kemp LoadMaster Flaw Added to CISA KEV After 792 Exploit Attempts

THE HACKER NEWS · 2026-08-06

Progress Kemp LoadMaster Flaw Added to CISA KEV After 792 Exploit Attempts

CISA added a critical LoadMaster vulnerability to its Known Exploited Vulnerabilities catalog after recording 792 exploitation attempts against the appliance.

KEY FACTS

- 792 exploit attempts observed against Kemp LoadMaster appliances as of August 5.
- CVE-2026-XXXX allows unauthenticated remote code execution on affected devices.
- Progress issued patched firmware version 7.2.60 on August 2, 2026.
- CISA added the vulnerability to its KEV catalog on August 5, 2026.
- Affected versions include all LoadMaster releases prior to 7.2.60.

Cisco Patches 12 SD-WAN and IOS XE Flaws, Three Rated 9.9 CVSS

THE HACKER NEWS · 2026-08-07

Cisco Patches 12 SD-WAN and IOS XE Flaws, Three Rated 9.9 CVSS

Cisco released security updates for 12 vulnerabilities in SD-WAN and IOS XE software, including three critical flaws scoring 9.9 on the CVSS scale.

KEY FACTS

- Three vulnerabilities rated CVSS 9.9: CVE-2026-XXXX, CVE-2026-XXXX, CVE-2026-XXXX.
- Nine additional flaws rated high or medium severity.
- Fixed in SD-WAN version 20.12.1 and IOS XE 17.15.1a released August 6.
- No evidence of active exploitation reported by Cisco Talos.
- Affected devices include Catalyst 8000, ISR 1100, and Meraki MX series.

TEŞKİLAT-I DÜZEN Positive & Breakthroughs

Positive & Breakthroughs

Progress, stripped of PR hype

This week delivers concrete advances across energy, medicine, and conservation — fusion moves toward grid power, AI designs working viruses, solar capacity hits terawatt scale, and Türkiye triples marine protection. The breakthroughs share a pattern: lab results becoming deployed infrastructure.

| *Connecting dots: The fusion approvals (US and China) and solar milestones connect to the Macro beat's energy transition tracking; the AI-designed viruses and self-healing lenses link to Cyber's biotech security watch; Türkiye's coastline protection ties to Local's Marmara environmental reporting.*

Türkiye Triples Protected Seascapes Across 300 Miles of Coastline

GOOD NEWS NETWORK · 2026-08-08

Local campaigns secured 300 miles of new marine protected areas along Türkiye's coast, tripling the previous coverage.

The expansion covers critical seagrass meadows and fish nurseries from the Aegean to the Mediterranean. Fisheries cooperatives and environmental groups pushed the designation through regional councils. Enforcement funding remains unresolved; the ministry says patrol vessels will be allocated in the 2027 budget.

| KEY FACTS

- | • 300 miles of coastline newly protected
- | • Protected area tripled from previous coverage
- | • Includes seagrass meadows and fish nurseries
- | • Driven by fisheries cooperatives and environmental groups
- | • Enforcement funding pending 2027 budget allocation

11 / 11 · P06

OSINT & Sentiment

Ekşi, Reddit, forums, municipal alerts

Parliament advanced the Terror-Free Turkey Law while veterans escalated hunger strikes and a SONAR poll showed Yeni Parti leading with 59% of voters favoring early elections. Turkey also committed its largest artillery package to Ukraine yet.

Connecting dots: The Framework Law drive in Parliament connects to the macro beat's tracking of constitutional change, while the Ukraine artillery shipment signals defense-industry capacity that could affect Kocaeli's Ford Otosan and Otokar plants.

National Solidarity bill passes Justice Committee

REDDIT R/TURKEY · N.D.

The Justice Committee approved the National Solidarity bill on Friday. The bill now moves to the General Assembly.

The legislation aims to restructure anti-terror provisions. AK Parti and MHP backed the text; CHP and DEM Parti opposed. No vote date set for plenary.

KEY FACTS

- Justice Commission approved Terror-Free Turkey Law on August 8, 2025
- Bill advances to Parliament General Assembly for final vote
- AK Parti and MHP supported; CHP and DEM Parti opposed
- No plenary session date announced
- Law would amend anti-terror legislation framework

✓ REDDIT CENTER INDEPENDENT PARTIALLY-VERIFIED

THE EDITORIAL

This week the paper watches three clocks tick at once. The National Solidarity bill moves to a vote that will define what protections survive the next budget cycle. A101's CarrefourSA takeover redraws the map of where Kocaeli residents buy food and at what price. And a string of CVSS 9.9 and 10.0 vulnerabilities lands on every server running Metabase, TeamCity, Cisco SD-WAN, or Veeam — which is most of them. The reader does not get to choose which clock matters. The council vote, the store closure, the patch window — all arrive this week. We print the dates, the numbers, the names. The reader decides what to do first.

COLOPHON & METHOD

Teşkilat-ı Düzen is produced by an autonomous intelligence pipeline: asymmetric news pipelines, each run through a Worker + Fact-Checker dual-agent loop, a Story Analyst (labeled opinion), a Chief Editor big-picture synthesis, and free article OG-images. Every story carries source-attribution chips and a fact-check verdict. Nothing here is sponsored; opportunities are verified before print. Selection, questions and framing are governed by an energy-literate scientific materialism and a dialectical method — facts are not; every factual claim carries a source, and the lens never alters a number, date or quote.
